Audio/Video Broadcast System Upgrade for the County of El Paso

RFP # 16-057

**Opening Date
Tuesday, September 13, 2016**

1. PURPOSE

The County of El Paso (the County) is issuing a Request For Proposal (RFP) for potential solutions to upgrade our current Video Broadcast System. Responses to this request will be utilized to identify requirements for the Video Broadcast System. Responses will also be evaluated for technical, functional, and procedural innovations. The Information Technology Department (ITD) will review the responses to determine the County's present and future functional needs.

The County of El Paso is requesting information on professional broadcast quality hardware and implementation services to replace our current video broadcast system. The preferred solution should utilize up-to-date industry standards to ensure efficient use of system resources and ease-of-use.

RFP responses must encompass a complete solution to the County's needs. Vendors should provide enough information about their Video Broadcast System to allow the County to judge its functionality and suitability. This may include flowchart overviews and hardware lists.

The mission of the El Paso County Information Technology Department is to provide a reliable, highly efficient and transparent informational video broadcast solution for constituents. By providing an accessible and modern solution, citizens of El Paso County and their visitors can enjoy an enhanced quality of life with open government.

2. BACKGROUND INFORMATION

The County of El Paso currently broadcasts Commissioner's Court meetings through standard definition via city channel 15 and its online streaming service accessible through www.epcounty.com. Hardware upgrades are no longer feasible with the County's current equipment to attain a higher resolution broadcast and implement additional requested features. Below is a listing of the County's current major system components:

- Edirol LVS-400 Live Video Mixer
- Panasonic AG-HVX200 Cameras
- Mackie Onyx 1220 Audio Mixer
- Osprey 230 Video Capture Cards
- Pioneer DVD Recorder
- Panasonic DVCPRO Recording Deck
- 15" LCD Preview Monitors
- EVI-HD3V PTZ Cameras
- RMIP10 IP Remote Controller

Existing hardware and design layout have been in place over seven (7) years. Replacement is necessary to meet the demand for higher quality services and upcoming industry standards.

Goals of the Upgrade: To have a system that provides a higher definition image which allows for more detail to be displayed on screen. Current resolution for web stream is 320x240 that can be scaled to 640x480. Upgrade will provide HD resolution up to 1080P. Some user interface features such as PIP and multiple overlays are limited by current setup due to number of video inputs. New system will allow for more input/output signals than the current 4 port switch allows.
