March 21, 2013

To the Honorable District Judges, County Court at Law Judges,
County Probate Judges, Commissioners Court Members,
Citizens of El Paso County and the Financial Community:

Texas Local Government Code, §114.025, requires that the County Auditor publish in April of each year, subsequent to the close of each fiscal year, a complete set of financial statements presented in conformity with generally accepted accounting principles (GAAP) and audited in accordance with generally accepted auditing standards by a firm of licensed certified public accountants. Pursuant to that requirement, we hereby issue the Comprehensive Annual Financial Report (CAFR) of the County of El Paso, Texas (County) for the fiscal year ended September 30, 2012.

This report consists of management's representations concerning the finances of the County. Therefore, management of the County assumes the responsibility for accuracy, completeness, fairness and reliability of the financial data presented in this report, including all disclosures. To provide a reasonable basis for making these representations, management of the County has established a comprehensive internal control framework that is designed both to protect the government's assets from loss, theft, or misuse and to compile sufficient reliable information for the preparation of the County's financial statements in conformity with GAAP. Because the cost of internal controls should not outweigh their benefits, the County of El Paso's comprehensive framework of internal controls has been designed to provide reasonable rather than absolute assurance that the financial statements will be free of material misstatement. As management, we assert that, to the best of our knowledge and belief, this financial report is complete and reliable in all material respects.

This report is designed to present fairly the financial position and results of financial operations of the County in all material respects and to demonstrate compliance with applicable finance-related legal and contractual provisions. This report adheres to the principal of full disclosure to the best of our ability so that the readers may better understand the County's financial affairs.

Gibson, Ruddock, Patterson, LLC, an independent certified public accounting firm has audited the County of El Paso's financial statements. The goal of the independent audit was to provide reasonable assurance that the financial statements of El Paso County for the fiscal year ended September 30, 2012, are free of material misstatement. The independent audit involved examining on a test basis, evidence supporting the amounts and disclosures in the financial statements; assessing the accounting principles used and significant estimates made by

management; and evaluating the overall financial statement presentation. Based on the independent audit performed by our external auditors, they have concluded that there was a reasonable basis for rendering an unqualified opinion that the County of El Paso's financial statements for the fiscal year ended September 30, 2012, are fairly presented in conformity with GAAP. The independent auditor's report is presented as the first component of the financial section of this report.

Additionally, the independent audit of the financial statements of the County of El Paso was part of a broader, federally mandated "Single Audit" designed to meet the special needs of the federal grantor agencies. Standards governing Single Audit engagements require the independent auditor to report not only on the fair presentation of the financial statements, but also on the audited government's internal controls and compliance with legal requirements, with special emphasis on internal controls and legal requirements involving the administration of federal awards. These reports are available in the County of El Paso's separately issued Single Audit Report by Gibson, Ruddock, Patterson, LLC. The County's Single Audit was prepared pursuant to provisions in the Single Audit Act and the Single Audit Act Amendments of 1996 of the Executive Office of the President, Office of Management and Budget Circular A-133, entitled *Audits of States, Local Governments, and Non-Profit Organizations* and the *State of Texas Single Audit Circular*. The County's single audit for the fiscal year ended September 30, 2012 disclosed no material weaknesses in the internal control structure. Furthermore, this CAFR is presented according to the reporting model established by GASB 34 and related statements.

GAAP requires that management provide a narrative introduction, overview, and analysis to accompany the basic financial statements in the form of Management's Discussion and Analysis (MD&A). This letter of transmittal is designed to complement the MD&A and should be read in conjunction with it. The County of El Paso's MD&A can be found immediately following the report of the independent auditors.

El Paso County Government Profile

El Paso County was created from Bexar District in 1849, organized in 1850, and incorporated in 1871. Parts of El Paso County were taken to form Culberson County in 1911 and Hudspeth County in 1915. The County was named for being a well-known pass through the Rocky Mountains. It is the most western county in Texas, and is about equidistant from Houston, Texas, Los Angeles, California and Denver, Colorado. Also, bordered on the east side by Hudspeth County, El Paso County is just to the north of the International Boundary between the United States of America and the Republic of Mexico, and touches Doña Ana County in New Mexico. County government in Texas is, for many people, the primary and most accessible level of government. County governments are political subdivisions of the State. The State has created 254 counties. Initially, the counties were primarily created to facilitate the judicial system. As a result of State legislative changes over the years, county governments in Texas are involved not only with the judicial system, but also the delivery of health and welfare services, public safety, cultural and recreational activities, and construction and maintenance of roads and bridges. In comparison to some of the other states, Texas counties have only a very limited ordinance making authority, as specifically granted by the State legislature.

Counties in Texas have many comparable characteristics and are similarly organized. Each county has a governing body called Commissioners Court. The Commissioners Court is composed of five members. One member, the county judge, is elected at large to a four-year term. The other

four members are county commissioners. Each county commissioner is elected from a precinct to a four-year term. County judges have judicial responsibilities in all but the largest urban counties. In large urban counties, such as El Paso County, the county judge has no judicial responsibilities. Instead, the El Paso County Judge is often referred to as the County's Chief Executive Officer (CEO). In all Texas counties, the County Judge presides over commissioners court meetings.

The Commissioners Court serves as the executive branch of county government. Among a myriad of constitutional and statutorily imposed duties and responsibilities, the five members of commissioners court have the exclusive responsibility and authority over a multitude of areas in the operation of county government. To name a few, the Commissioners Court is responsible for approving the county's operating budget and budgetary amendments, setting ad valorem property tax rates, auditing and directing settlement of all claims against the County. Additionally, this body appoints certain county officials and board members. The Commissioners Court also determines when propositions to issue bonds will be submitted to the voters.

The County is a strategic cross-roads for continental north-south and east-west traffic. The County spans a geographic area of about 1,058 square miles. The County enjoys fairly sound economic diversification. Being that El Paso is in the heart of the Southwest, many businesses are attracted to the El Paso/Juarez region. According to the latest U.S. Census Bureau population figures, the County population is at 820,790. The City of El Paso, the County seat, is estimated as having a population of 649,121. El Paso is the largest City in the United States that borders Mexico. Based on population, El Paso is the sixth largest city in Texas. Larger than Boston, Seattle, and Denver, the City of El Paso is the 19th largest city in the U.S. Combined with its sister city, Juarez, Mexico, the El Paso metro area holds more than 2.2 million people, making it the world's largest population center on an international border. With four international ports of entry, El Paso is a primary intersection for regional trade in the Southwest. In 2012, *Forbes* ranked El Paso number one on its list of "Best Mid-Size Cities for Jobs." *New Geography Magazine* ranked El Paso fourth on the list of "Best Medium Sized City for Job Growth," and Farmers Insurance Group ranked El Paso third on the list of "Most Secure U.S. Places to Live" among the large metro areas.

El Paso County and neighboring Ciudad Juarez, Mexico are separated by the Rio Grande River. According to estimation by local officials, the Ciudad Juarez metro population is 1,457,955. The geographic location of El Paso encourages enterprising businesses the unique versatility of being internationally known while remaining in the United States. There has been an increase in Mexican businesses relocating to El Paso, with 280 new businesses opening shop here as of January 2011 compared with only nine in February 2010, according to La Red, a group of Mexican businessmen in El Paso.

With Interstate 10 running east to west through El Paso and its proximity to Interstate 25 and Mexico's Pan American Highway, this area represents a trade corridor with accessibility to rail lines and four international ports of entry with Mexico. Over a number of years, the County has been actively involved in the creation of a new port of entry in Fabens, Texas known as the Tornillo Guadalupe Port of Entry. As of fiscal year 2012, capital appropriations related to this project totaled \$66,790,114, of which \$7.4 million are Road and Bridge funds, while all years expenditures as of September 30, 2012 totaled \$33,957,472. Funds expended to date relate to environmental assessment; bridge design; purchase of land and right-of-way necessary for this project; and construction in progress. Of the \$33.9 million in expenditures, \$1.4 million represents land donated to the U. S. General Services Administration. Also, a significant amount relates to the efforts for securing the presidential permit to move forward on construction of the port of entry. Based on the fact that a presidential permit was issued in fiscal year 2005, El Paso County continues its negotiations with federal, state and international officials on the timely construction of this bridge in unison with other agencies and anticipates completion of the County's portion by the fall of 2013. Various sources to fund the construction of this bridge have been secured and require that other agencies fund and construct their facilities in a timely manner.

Commissioners Court is considered financially accountable for the El Paso County Hospital District (District), also known as University Medical Center, and its activities are included in this CAFR. As a component unit, the District is included in this CAFR because the El Paso County Commissioners Court, the County's governing body, has the legal duty to exercise financial accountability over it by appointing its board members, approving its budget and setting its tax rate. Nonetheless, the District is a completely separate and dissimilar organization that is governed by the *Texas Constitution, Article 9, § 4* and the *Health and Safety Code, Chapter 281*, a different set of constitutional and statutory laws. All accounting and budgeting records of the District are maintained by the District, audited by an independent accounting firm and reported on in much greater detail in their various interim and annual financial reports. Copies of any of the District's financial reports can be obtained directly from the District or from their website at www.umcelpaso.org.

The County's budget is prepared and adopted annually as a balanced budget pursuant to Texas law. A balanced budget is achieved by ensuring that the amounts budgeted in a fiscal year for expenditures do not exceed the projected revenues, to include any available fund balances. The appropriations of the activities of the General, Special Revenue, Enterprise, and Debt Service Funds are included in the annual budget. Also, budgets are adopted for the major capital construction projects and grants. Grant and capital project budgets may be included in the adopted budget when pertinent information is available; otherwise, these funds are budgeted throughout the year as relevant financial information becomes available.

The County's appropriations for departments are approved at the character level, representing personnel, operating and capital line items. The Commissioners Court has a standing order not to allow departments to transfer salary appropriations to non-salary line items without specific authorization from the Court.

The County's budgetary and accounting records are organized and operated on a fund basis. A "fund" is a fiscal and accounting entity with a self-balancing set of accounts recording cash and other financial resources, which are segregated for the purpose of carrying on specific activities or attaining certain objectives in accordance with special regulations, restrictions or limitations.

Funds are categorized by type to indicate both the sources of the fund's financial resources and the nature of activities financed. There are three broad categories of funds used in governmental accounting: governmental, proprietary, and fiduciary funds.

Factors Affecting Financial Condition

Information presented in these financial statements is perhaps best understood when considered from a broad perspective of the specific environment within which the El Paso County operates.

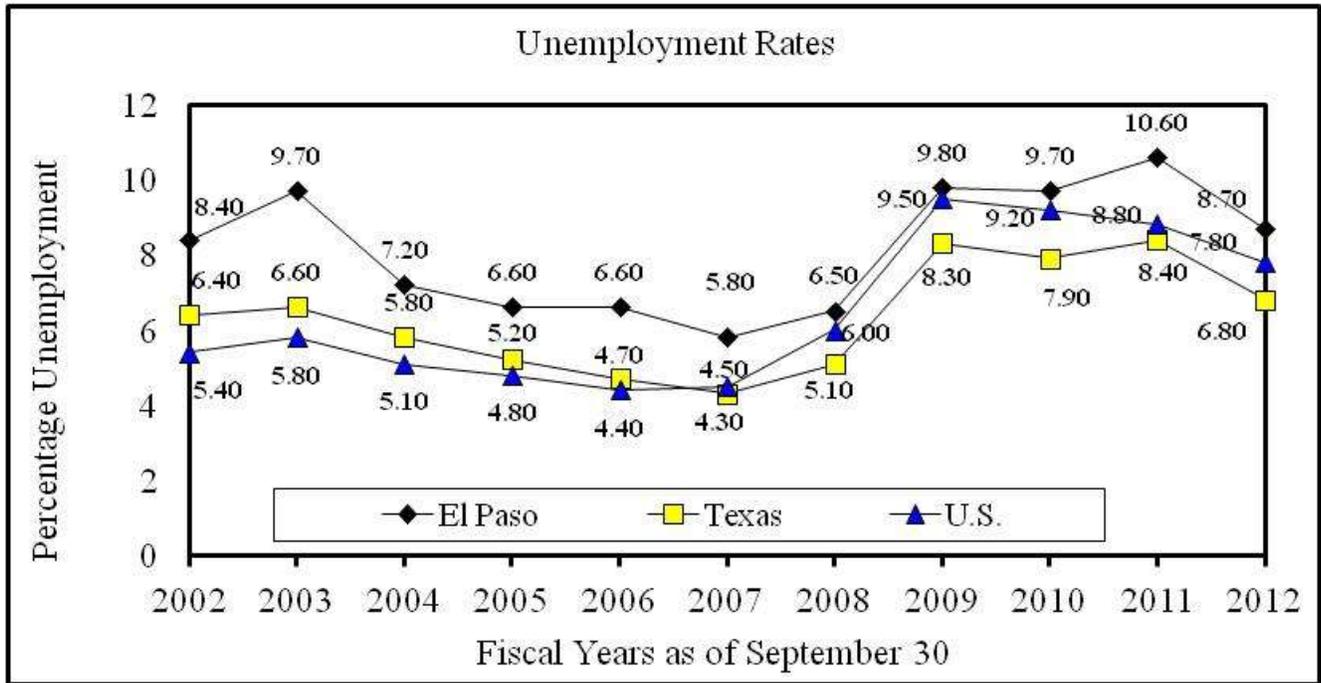

El Paso MSA Nonagricultural Employment by Industry

Local Economy. The El Paso region continues to experience moderate growth in the economy, with a positive employment movement of 2.09 percent overall, as reflected on the chart above. Government remains vital to the economy, as our single largest economic driver is the Fort Bliss Military Base. For 2012 the Army's Fort Bliss regional military complex reported a population of 91,600, which includes nearly 34,100 active-duty personnel, 46,700 family members and almost 10,800 civilian employees. Demographic growth is expected to continue into 2013 and beyond. This is the largest projected net gain for any military installation in the U.S. The increases are part of Defense Department projects including Army Modular Force initiative, global repositioning, and the 2005 Base Realignment (BRAC) process. This has signaled plans to expand the army and restructure brigade combat teams, support brigades and combat services across the country. It is estimated that Fort Bliss will provide a \$3.8 billion economic impact to the local economy, and the Army will invest nearly \$5 billion in new facilities and infrastructure by 2013. Being that the El Paso area serves as a vital retail trade center for far West Texas and northern Mexico, the County's economy is bolstered by a variety of sectors. The regional economy is predominantly comprised of agriculture, agribusiness, manufacturing, tourism, wholesale and retail trade, and government. Farming and ranching have been mainstays of the economy for more than 100 years. El Paso County has developed an economy that is driven largely by international trade, military training, wholesale and retail trade, and educational services.

The chart above reflects a high level summary of El Paso's changes in the employment industry components. Although El Paso's unemployment rate remains higher than that of the rest of the State, as well as that of the nation, as depicted on the following page, El Paso should continue to see future employment gains as the national economy stabilizes. Historical trends indicate El Paso's gains should align closer to that of the rest of Texas.

Over the past fiscal year, between September 2011 and September 2012, El Paso gained 5,900 jobs overall. Further analysis reflects that 6,100 job gains were netted with 200 job losses. The various job gains occurred in construction 500; trade 700; transportation 100; financial activities 200; general services 2,200 and total government sectors 2,400. Only the information and manufacturing sectors experienced decreases of 100 each. The manufacturing sector continues to experience decreases and can be attributable to apparel manufacturers shifting operations from El Paso to Mexico and Asia in order to reduce manufacturing costs. This is consistent with the nationwide trend of cost cutting within the apparel manufacturing sector.

El Paso evolved from an agricultural economy to what it is today, an international center of trade and manufacturing with an increasing population. According to the Texas A&M Real Estate Center Report and verified by El Paso Regional Economic Development, the city's top ten non-local government employers in 2012 are Fort Bliss (37,833), T&T Staff Management (4,687), Tenet Healthcare Ltd. (3,053), University Medical Center (2,310), Dish Network (1,830), GC Services (1,791), RM Personnel (1,317), Texas Tech University Health Science Center (1,235), Del Sol Medical Center (1,100), and Automated Data Processing (1,000).

According to the Texas Workforce Commission's October 2012 issue of Texas Labor Market Review, the statewide unemployment rate was 6.8 percent in September 2012. When compared to the same time last year, this was 19.05 percent lower. As reflected on the graph above, El Paso's unemployment rate for September was 8.7 percent in comparison to 10.6 percent in September 2011.

El Paso's cultural and business ties as a border region with Mexico drive its economy. The attraction of El Paso County, as a favorable business environment is coupled with continued moderately low interest rates, which continues to stimulate local construction activity. In August 2012, Fort Bliss announced the development of a new 135-bed Army Medical Center. This \$946

million project will replace the current aging Beaumont Army Medical Hospital when it opens in 2015.

El Paso continues to transition from a goods-producing economy to a service economy. Overall, optimistic indications remain on the County's financial outlook given our low government taxes, abundance of labor, and moderate wage rates. Additional information on El Paso County may be obtained by visiting El Paso County's website at <http://www.epcounty.com/history/>.

Long-Term Financial Planning. County strategies and plans are integrated into all departmental budgets to ensure unified efforts within County government to achieve the goals and objectives of the County. Texas county government operates under a balanced budget as required by law. This does not mean that estimated revenues must always be exactly equal to expenditures. In most of the annual operating budgets, the Commissioners Court members usually decide to use a portion of fund balances reserves to balance the revenues to appropriations. As a sound financial management practice, members of the Commissioners Court consistently emphasize maintaining sufficient unassigned fund balance levels (unrestricted net assets) to meet first quarter obligations of payroll and operating costs and furthermore, this assists in maintaining financial stability and retaining or enhancing the County's bond ratings.

Over the years, the County has emphasized stabilization of ad valorem property tax rates. The court increased its tax rate to \$0.361434 in fiscal year 1999 and maintained this same rate through fiscal year 2002. During these years, the County was fortunate to receive various uncertified and unbudgeted cash reimbursements, which resulted in significant fund balance gains. The drawback to this was that various administrations subsequently set expenditure levels significantly higher than sustainable actual future revenues.

As a result, subsequent tax rate increases were necessary and in fiscal year 2005 the rate was set at an all time high of \$0.432259 per \$100 valuation. Subsequent to reappraisals and new values being added to the taxable base, El Paso County's rate was reduced in 2009 to \$0.342437 and set at \$0.338258 in 2010, \$0.363403 in 2011 and lowered to \$0.361196 in 2012. In addition, revenue generating initiatives to more effectively collect various county fines and fees were implemented. This included adding staff to the Justices of the Peace Offices, County Sheriff, and Constables in order to collect on outstanding warrants, as well as implementing a SCOFFLAW program, whereby auto registration renewals were denied to motorists with outstanding traffic warrants.

Fund balance refers to the excess of assets over liabilities in governmental funds. As stated in the County's financial policies, for the purpose of financial planning, fund balance is defined as the cumulative surpluses or deficits resulting from the difference between expenditures and revenues in any one fiscal year. The cumulative effect of yearly fund balance amounts is furthermore addressed as a fund balance reserve. When evaluating fund balance reserves, it is vitally important to maintain sufficient positive fund balance reserves in order to avoid borrowing to meet short term operating needs.

As a rule of thumb, since the General Fund is the County's main operating fund, the County strives to maintain an unassigned general fund balance of, at a minimum, equal to projected cash needs for the first fiscal quarter to meet operating obligations (approximately \$20-25 million net cash flow) or 10-15 percent of the total general fund adopted operating budget in any one fiscal year. At the present level, this means that the County should strive to maintain a minimum

unassigned general fund balance of at least \$23,079,471 based on the fiscal year 2013 General Fund budget of \$230,794,713. Maintaining a low fund balance could force the County to resort to short-term borrowing to meet payroll and operations for the first quarter of the fiscal year. Also, low fund balance may potentially result in the County being vulnerable to lower bond ratings. Lower bond ratings may ultimately result in more costly future borrowing at higher interest rates, and therefore, increased interest expense in response to an entity's declining financial position depicted at any one point in time. In essence, having some amount of fund balance gives the County the financial ability to cover unanticipated revenue losses or significant unanticipated expenditures, should they occur.

Historically speaking, the County was able to achieve its reserve goal in force at that time of 10 percent of undesignated general fund balance in fiscal year 1998. Continued persistence and emphasis on building and maintaining some amount of reserves resulted in a stable fund balance reserve in the General Fund through fiscal year 2008. It is noteworthy to mention that the actions of Commissioners Court throughout fiscal years 2009, 2010, 2011 and 2012 had a contributing effect of enhancing a favorable expenditure budget variance, or unspent budget balance, within the General Fund.

The Court's continuing fiscal restraints, along with higher revenue streams, resulted in fiscal year 2012 revenues outpacing expenditures by \$3,157,458, and thus increasing the general fund balance by almost 7.9 percent from the previous year. Revenues and other sources grew by approximately \$317,000 or .16 percent. An increase of \$5 million in property taxes was offset by declines in the areas of intergovernmental and fines and forfeits. Overall, expenditures and other uses increased by \$11.3 million or 5.9 percent, mainly attributed to the Sheriff's collective bargaining agreement, as well as a cost of living afforded to all other employees.

For fiscal year 2013, the Court increased its use of fund balance in the budget by \$276,685 or about 2.5 percent over the previous year for a total of \$11,196,594. As a result, the County ended fiscal year 2012 with an unassigned fund balance of \$38,317,585, and surpassed its minimum target goal of 10.0 percent, with a ratio of 16.6 percent of the fiscal year 2013 adopted general fund budget of \$230,794,713.

It is vitally important that the Commissioners Court remain focused on trends of the general fund, especially in light of the recent funding cuts from the State during the last legislative session. It is imperative that the Commissioners Court continue to focus on revenue enhancement in order to adequately fund present and future mandates placed on County government. As in the previous fiscal year, the fiscal year 2013 budget incorporated additional funding for the sheriff's department collective bargaining agreement for law enforcement. Also, the County reinstated the merit step increases as well as a cost of living increase for all other employees. Departments will continue to be challenged to increase efficiencies in order to operate within their budgets. More than ever, monitoring of revenues and expenditures will be paramount in forecasting budget inadequacies and identifying potential excesses.

For the future, it is anticipated that in fiscal year 2013 the Court will continue to face significant funding challenges. Some of those challenges will be additional operating costs of new facilities and automatic contractual collective bargaining salary adjustments for the sheriff's department. Specific monitoring will remain focused on revenues related to hotel occupancy and

sales and use taxes as they tend to be impacted negatively during times of national and international conflict due to the nature of El Paso County's proximity to the international border. Also, expenditure growth due to inflation and the possibility of new mandates will be challenges faced by the Court.

Finally, as a result of the trend of shifting of unfunded mandates by both federal and state levels to local government, it is anticipated that additional financial burden will continue to be experienced by the County and ultimately local taxpayers if other sources of funding are not identified. The County will be tasked with identifying new or additional revenues to counter these expenditures. At its discretion, the Court will probably continue to utilize some amount of fund balance, which is healthy in the sense that it keeps the County from building up excessive reserves and reduces a future burden on taxpayers. Based on the amount of fund balance utilized to balance the 2013 budget, the Court must remain cautious in planning for future budget years in the absence of either continued cost containment initiatives or significant additional revenue enhancement efforts. It is imperative that County government continually strive to maintain steady increases in revenue while costs are on the rise.

Major Initiatives. During fiscal year 2012, some of the major initiatives funded with the debt issued in previous fiscal years were either completed or substantially completed. Some of the ongoing projects are the Ascarate Park Improvements, the Disaster Recovery Data Center, the Judicial Administration Computer System, the County Sportspark, and the Jail Annex Expansion. With the July 2012 debt issuance, additional allocations were made to the port of entry.

Awards and Acknowledgements. The Government Finance Officers Association (GFOA) awarded a Certificate of Achievement for Excellence in Financial Reporting to the County of El Paso for its comprehensive annual financial report (CAFR) for the fiscal year ended September 30, 2011. This was the 23rd consecutive year that the County of El Paso has received this prestigious award. In order to be awarded a Certificate of Achievement, the County published an easily readable and efficiently organized CAFR. This report satisfied both GAAP and applicable legal requirements. We believe that our current CAFR continues to meet the Certificate of Achievement Program's requirements and we are submitting it to the GFOA to determine its eligibility for another certificate.

Additionally, the County of El Paso received the GFOA's Distinguished Budget Presentation Award for its annual budget document for the 2010 fiscal year beginning October 1, 2009. This was the 16th consecutive year that the County of El Paso received this prestigious award. The County did not submit a budget document for fiscal year 2011 but did submit one for fiscal year 2012, which also qualified for the Award. In order to qualify for the Distinguished Budget Presentation Award, the County's budget document was judged to be proficient in several categories, including as a policy document, a financial plan, an operations guide, and a communications device. A Certificate of Achievement is valid for a period of one year only.

The preparation of this report would not have been possible without the efficient and dedicated services of the County Auditor's staff. I would like to express my appreciation to all members of the department who assisted and contributed to the preparation of this report. Credit also must be given to the Commissioners Court for their unfailing support in maintaining the highest standards of professionalism in the management of the County of El Paso's finances. I express my sincere thanks to the Council of Judges and other County officials, Department Heads,

and employees for their roles in directing the financial affairs of the County in a responsible and professional manner.

Respectfully submitted,
