## **Eastlake Water Line Community Project Update**

El Paso County would like to inform the community about the ongoing travel and lane closures affecting the east and south bound lanes of Eastlake Boulevard.

Currently, the Horizon Regional Municipal Utility District (MUD) is working hard to complete the repairs of a leak to a main water line along Eastlake. For the safety of construction crew working in the area and the location of the water line, two (2) travel lanes have been closed. Repairs to the water leaks have been completed, however the compaction of the soil and the placement of new concrete that was removed in order to excavate and locate the water leak to perform the required repairs require additional work to the area.

The County would like to thank the community for their patience and understanding of crew members working diligently to minimize the duration of the project. The County also requests motorists to respect the Traffic Control Zone for the safety of the crew working in the field.

The County will continue to update the public on this project. For any questions, please contact the Planning and Development Department at 915-546-2015.
