

Once again, the National Center for DWI Courts, in conjunction with the National Highway Traffic Safety Administration, has chosen County Criminal Court at Law Number Two's DWI Intervention and Treatment Program as one of four DWI Academy Courts! CCR2 was chosen from over 700 DWI Courts nationwide! Way to go, Judge Robert Anchondo and the DWI Drug Court Team!

Academy Courts serve as model court program training sites for future courts who desire to create their own DWI Drug Courts. They can host training sessions, provide technical assistance and help develop, create and identify and test national best practices for DWI Courts.

As impaired drivers are one of the most serious threats to our community and its safety, Academy Courts hold DWI offenders accountable for their actions, while at the same time affording them treatment and counseling they need to change and turn their lives around.
