ADDENDUM 1

To: All Interested Proposers

From: Sally Borrego, Secretary

Date: February 27, 2007

Subject: Bid# 07-020, One Motorola Work Station

The Purchasing Department received questions relating to the above referenced proposal.

1. Per the Motorola R56, their consoles require a Transient Voltage Surge Suppression (TVSS) device at each dispatch position to protect the dispatcher from transients, static, lightning and other power anomalies. I notice your bid did not include this item. Attached is a specification of the product my company, Transtector Systems, designs for the Motorola Centrecomm Series Consoles. It is normally included with the console when it ships. Is this something that the City of El Paso is going to need, or would like to include in their console?

Our entire center is grounded; we will have enough grounding to support and additional radio system. This grounding is located beneath the floor of the Communications Center.
