### ADDENDUM 1

**To:** All Interested Proposers  
**From:** Linda Gonzalez  
**Date:** September 6, 2007  
**Subject:** Bid # 07-111, Barrier Netting and Seven Shade Structures for the Ascarate Golf Course Driving Range

---

The Purchasing Department received questions relating to the above referenced Proposal.

1. Under netting Page 4, it states 1,858 as inches. Is it feet or inches? Please Clarify.  
**The request is for 1,858" of 20'high netting.**
2. Under the shade structure in order to meet 100mph the poles would have to be steel, not poles or is there an existing structure.  
**There is no existing structure. We envision joined structures that create a significant shaded area. Please bid whatever materials meet the specifications. This area is known for high winds and any shade structure must be able to withstand significant wind forces.**
3. It also states: the preferred shade structure is a joined structure with seven tops. Is this to be joined with another structure already there or will you need poles. If the structure is already there can we have a design or plans of the structure?  
**The structure is freestanding so a support system is necessary. Again, we envision this as a joined structure with seven roofs.**

4. We do not use Polyethylene netting. We use polyester netting 125 lbs breaking Strength which is fare superior and much stronger with 3/8 roper border using galvanized snaps.

**This is an acceptable substitution.**

5. I would like to receive information on how to obtain a set of plans for this project.

**We do not have plans.**

6. May we bid only on the seven shade structures? If so is this total price include installation?

**We prefer a bid with installation included.**

7. Is there a drawing of the Seven Shade Structures to show what their shape is?

**We do not have any drawings. The preferred shape is joint hip canopy or equivalent.**
