## ADDENDUM 2

**To:** All Interested Proposers  
**From:** Lucy Balderama, Inventory Bid Technician  
**Date:** November 4, 2009  
**Subject:** BID #09-083, Reconstruction of Campo Bello Estates

---

**The Purchasing Department received a question relating to the above referenced proposal; the response to the following question:**

1. On the plans sheets 4-10 are showing Alternates # 1, 2 & 3 stating that the Contractor shall **“adjust”** existing boxes, manhole lids & fire hydrants.  
On the Bid Form (LUMP SUM CONTRACT) Sheet # 9 reads:  
Bidder agrees to perform all the paving and concrete curb work and **“relocation” of all manholes, valve boxes and utilities.**  
On the UNIT PRICES Sheet # 10 UTILITY IMPROVEMENTS – ALTERNATES there are Unit Prices for adjustments for items # 1 & 2 and relocation for item # 3.  
Where are we going to include the price for adjustments & relocations in the BASE BID or in the Unit Prices for Alternates?

**Alternates are unit price only and not part of base bid.**

2. On the plans sheet 2 of 20 on the GENERAL NOTES # 20 reads:  
Existing pavement shall be milled, scarified, processed and compacted as the **sub-base** layer of the new pavement section.  
BASE BID. Bidder agrees to perform all the demolition & disposal of existing pavement (may be recycled into the **new flexible sub-base** with Owner’s approval). This recycle material may be incorporated with the new 6” crushed flex base or in the 8” sub-base below new base.

**Recycled material is only for the 8” sub-base.**

3. We need clarification in reference of the relocation/adjustments of the existing utilities.  
If you see the attached **General Notes** shown on the plans on Item # 18 says: (Utility Companies shall be responsible for those relocations and adjustments) Contractor shall coordinate only.  
On the Sheet Plans on Alternates # 1, 2 & 3 says: (Contractor shall adjust or relocate utilities)  
Please Clarify.

**Utility Companies shall be responsible for those relocations and adjustments; showing the cost for the alternates is for said companies to decide whether or not have the same contractor relocate these services for them.**

4. On the plans sheets 4-10 are showing Alternates # 1, 2 & 3 stating that the Contractor shall **“adjust”** existing boxes, manhole lids & fire hydrants.  
On the Bid Form (LUMP SUM CONTRACT) Sheet # 9 reads:  
Bidder agrees to perform all the paving and concrete curb work and **“relocation” of all manholes, valve boxes and utilities.**  
On the UNIT PRICES Sheet # 10 UTILITY IMPROVEMENTS – ALTERNATES there are Unit Prices for adjustments for items # 1 & 2 and relocation for item # 3.  
Where are we going to include the price for adjustments & relocations in the BASE BID or in the Unit Prices for Alternates?

**Alternates are unit price only and not part of base bid.**

5. On the plans sheet 2 of 20 on the GENERAL NOTES # 20 reads:  
Existing pavement shall be milled, scarified, processed and compacted as the **sub-base** layer of the new pavement section.  
BASE BID. Bidder agrees to perform all the demolition & disposal of existing pavement (may be recycled into the **new flexible sub-base** with Owner’s approval). This recycle material may be incorporated with the new 6” crushed flex base or in the 8” sub-base below new base.

**Recycled material is only for the 8” sub-base.**

6. On the plans sheets 4-10 are showing Alternates # 1, 2 & 3 stating that the Contractor shall adjust existing boxes, manhole lids & fire hydrants.  
The Bid Form is not showing Alternates only a LUMP SUM price (BASE BID). Which one is correct?

**Alternates are unit price only and not part of base bid.**

7. On the plans sheet 2 of 20 on the GENERAL NOTES # 20 reads:  
Existing pavement shall be milled, scarified, processed and compacted as the **sub-base** layer of the new pavement section.  
On the specs sheet # 68 INVITATION FOR BIDS reads:  
BASE BID. Bidder agrees to perform all the demolition & disposal of existing pavement (may be recycled into the **new flexible sub-base** with Owner’s approval). This recycle material may be incorporated with the new 6” crushed flex base or in the 8” sub-base below new base.

**Recycled material is only for the 8” sub-base.**
